

# By Carers, For Carers Event

We are facilitating and supporting carers, and former carers, of people living with dementia to run their own local events in communities across England. These events have carers at their heart, leading the way. We want to provide carers with a safe and supportive environment to explore the impact of caring on them as an individual.

The first event will take place in **Manchester on Wednesday 18th April 2018**. This event will be co-sponsored by tide (together in dementia everyday) and Dementia United. The event will be organised by a steering group of people with experience of caring for someone living with dementia and is open attendance for all carers, and former carers in Greater Manchester.
